

NETWORK FOR
SUSTAINABLE
BUSINESS

About us

As a network, B.A.U.M. is committed to advancing the central issue: a future worth living through sustainable business within planetary boundaries. Founded in 1984, the association, with almost 800 members, is today a strong voice of sustainably operating companies and a driving force for sustainable development in Europe.

B.A.U.M. supports its members in the establishment and further development of sustainability strategies and connects actors from business, politics, science, media and associations. Committed companies receive a platform for practice-oriented exchange of information and experience as well as know-how and impulses. The goal is the transformation to a social-ecological market economy; the Sustainable Development Goals (SDG) of the United Nations and the Paris Agreement on Climate Protection are the guiding principles.

Current lighthouse projects of B.A.U.M. are the initiative **Wirtschaft pro Klima**, the project **SDG-Scouts** and the annual awarding of the B.A.U.M. | Environment and Sustainability Award. Other important fields of work are sustainable finance as well as forests and biodiversity.

B.A.U.M. is involved in numerous committees in order to effectively represent the interests of sustainably operating companies.
